Re: 21 U.S.C. Section 343(r)(6), Notification of Statements on Dietary Supplement

Dear Sir/Madam:

I hereby notify the Food and Drug Administration ("FDA") of the use of statements of nutritional support in the labeling of Parsley, a dietary supplement.

Statements being made in the labeling of Parsley, 450 mg Caps

(1) Parsley (*Petroselinum crispum*) is an herb native to the Mediterranean region, but is now cultivated in most temperate regions of the world. Parsley was known as early as the first century and was used by the Ancient Greeks and Romans as both a flavoring and garnish. Parsley provides Potassium, Vitamin A, and Folate and is high in chlorophyll. The aromatic oils of Parsley make it an ideal breath freshener.

To the best of my knowledge, and based upon information and belief present at the time of the executing of this notice, I certify that the above information is accurate and complete. NOW Foods possesses substantiation that the statements are truthful and not misleading.
